## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-3, drawn to a method of performing mutual authentication between a host and a terminal.

Group II, claims 4-17, drawn to an electric power meter that protects data processing by protection of stored data.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the power meter of Group II does not include the specific limitations of the methods of Group I. Specifically, Group II does not include the steps of mutual authentication performed in the invention claimed in Group I, therefore the two groups of claims are not directed to a process and an apparatus specifically designed for carrying out the process. See 37 C.F.R. 1.475.

3. A telephone call was made to Mitchell Brook on 28 June 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
